

Riverside Gardens

A new, 5 story, 200 unit modernist design residential complex constructed on formed waterway canals that traverse the center of this medieval city among buildings that date to the 11th and 12th century.

Architect

G + D Studiegroep Architect

Client

Riverside Garden Koepoortkaai, Ghent, Belgium

Features

- Individual units are paired so each elevator services on two units per floor
- 5 story reinforced concrete structure, including a courtyard plaza atop underground parking and storage
- glass, stucco, and stone façade

Special Interests

Private entrances provide exclusivity which is enhanced by the landscaped courtyard water feature that opens up into the canal and pedestrian waterway.

Services

Development Management
